

Fusion Ultra D/C™

Dual Curing Resin Based Luting Cement

Fusion Ultra D/C™ is a low viscosity, light and chemically cured, radiopaque, two component nano hybrid luting cement for adhesive luting of indirect composite, zirconium core, metal and porcelain/ceramic restorations to both dentine and enamel.

Indications

- Perfect cementation of metal as well as non-metallic posts.
- Permanent cementation of crown, bridges and splints
- Permanent cementation of implant retained crowns

Benefits

- Dual curing - light and self curing (Initial set time 2 minutes, final set time 5 minutes)
- Perfect fitting due to low film thickness <20µm
- Low solubility
- Fully compatible with Acrylic and Bis-Acrylic temporary material
- 2 stage polymerization allows fast and easy clean without compromising the working time

Chemistry

Fusion Ultra D/C is a blend of polymerisable resins, difunctional monomers, silanated submicron barium borosilicate glass, surface modified nano amorphous silica, curing initiators, stabilizers in two component-base catalyst pastes.

Application Technique

Presentation

Combo Pack :

Product Code : 30007

1 x 9g Automix Syringe, Translucent, 1 x 9g Automix Syringe, A₂
1 x 3ml Bonding agent, 1 x 3ml activator, 20 x Automix tips,
1 x Instruction Manual

Intro Pack :

Product Code : 30006

1 x 9g Automix Syringe, 10 x Automix Tips,
1 x Instruction Manual
